

HYDRA

BIO COMPOST

Biological Compost Accelerator

HYDRA®

Features & Advantages

- ◆ Accelerates compost making process with the help of biological components.
- ◆ Excellent compost fertiliser with completely organic constituents.
- ◆ Reduces the compost heap into fine, rich compost useful for applying throughout the garden .
- ◆ Composed of all natural ingredients and organic components.
- ◆ Prevents anaerobic digestion process that generates malodorous compounds and will deodorise any foul odours.
- ◆ Introduces aerobic action, eliminating the formation of toxic gases.
- ◆ Homogenous, easy to use. Contains no pathogens, hence safe to handle.
- ◆ Accelerates the decomposition of vegetable wastes and carbohydrates.
- ◆ A perfect compost fertilizer that reduces your compost heap into ready to use high quality compost.
- ◆ Does not contain any pathogens.

Description

100% organic Hydra Bio Compost accelerates the degradation of vegetable matter and carbohydrate waste to produce the highest quality compost. Ideal for professional compost manufacturers, parks and gardens management company and private individuals.

Hydra Bio Compost is a new compost accelerator that is a natural biocatalyst it also contains slow release oxygen agents which stimulates microorganisms to speed up the natural composting process.

It is a compost accelerator that will break down all your organic household and garden waste naturally to produce high quality rich compost that is ready to use.

Hydra Bio Compost is ideal for home garden composters, professional manufacturers, Parks and gardens caretakers.

Hydra Bio Compost is a granular powder which rapidly degrades garden waste with a predominantly carbohydrate content.

The bacterial and fungal strains in the product ensure complete degradation of such materials.

Hydra Bio Compost is a perfect compost accelerator that breaks down all garden and household green waste to give you quality compost.

The Solution

Hydra Bio Compost is a completely organic product with chosen strains of bacteria and fungi along with slow release oxygen agents.

The product prevents anaerobic activity and promotes aerobic bacteria to act upon the organic waste.

Aerobic digestion of garden waste does not produce malodours and toxic gases. The homogenous product is easy to use and does not contain any pathogens.

It effectively degrades the carbohydrate content in the composting heap.

Hydra Bio Compost is an effective natural soil conditioner for garden composting.

The product is equally useful for use by professionals and for commercial scale manufacturing of compost.

Add Hydra Bio Compost to the heap consisting of shrub and hedge clippings, dead leaves, lawn mowing, fruits vegetables and flowers, pruning wastes, everyday organic green refuse from household to get high quality, rich and ready to use compost.

The components expedite the degrading process along with preventing anaerobic activity and related malodours giving you natural compost aiding in maintain good garden health.

How To Use

Use blue measuring scoop supplied.

1 heaped scoop = 20g.

Dosage Rates

For every wheel barrow of rubbish add 20gms of Hydra Bio Compost to 1 litre of water.

Shake well in bottle then sprinkle liberally over the compost in the bin.

Turn the pile once a week to move material from the outside of the pile inwards.

Turning also keeps the pile from compacting, which reduces airflow and slows down decomposition.

Hydra Bio Compost produces fine natural compost suitable for all plants.

Laboratory Facilities

Hydra International Ltd.'s Research & Development Laboratories are a hub of activity where new products are developed and formulated. We have working relationships with our raw material suppliers, many of these suppliers are major world-wide chemical manufacturers with their own development laboratories.

As a company we are well known in the chemical industry for being receptive to cutting edge new chemicals which can be incorporated into our products to achieve performance advantages. An important part of the International Standards that we hold is that of constant improvement. We show that we have achieved this at every independent audit.
