## Description

When only the most effective product will do, **Hydra Hand Sanitiser Gel** is a gentle but powerful hand sanitizer gel.

Is highly effective against a wide range of harmful viruses and bacteria.

**Hydra Hand Sanitiser Gel** is a hospital grade 70% alcohol skin steriliser and is used throughout hospitals and operating theatres.

Safe to be used by all age groups.

Residual action offers protection against harmful microbes long after application.

## How To Use

### Dry Wash and Sanitising Hands

Dispense a small amount directly into palms.

Rub hands together, paying special attention to the area around nails.

Rub your hands until the product completely dries out.

### Sanitising Wet Hands

Wash hands, then apply **Hydra Hand Sanitiser Gel** onto the washed hands as a drying / sanitising agent.

**Hydra Hand Sanitiser Gel** act as a secondary disinfectant for extra protection while eliminating the need of using wipes or towels to dry up hands after washing with water.

### Hydra Hand & Surface Sanitiser Liquid

We also manufacture **Hydra Hand & Surface Sanitiser Liquid** which comes in bottles of 250ml, 1 litre and 5 litre.

## Laboratory Facilities

Hydra International Ltd.'s Research & Development Laboratories are a hub of activity where new products are developed and formulated. We have working relationships with our raw material suppliers, many of these suppliers are major world-wide chemical manufacturers with their own development laboratories.

As a company we are well known in the chemical industry for being receptive to cutting edge new chemicals which can be incorporated into our products to achieve performance advantages. An important part of the International Standards that we hold is that of constant improvement. We show that we have achieved this at every independent audit.
