

HYDRA

ALCOHOL SURFACE & HAND SANITISER LIQUID

HYDRA®

Features & Advantages

- ◆ 70% Alcohol based instant hand sanitiser liquid with powerful biocides that kills microbes on contact
- ◆ Effective against wide range of bacteria
- ◆ Fast drying formula
- ◆ Does not dry out the skin after use
- ◆ Hands remain soft and supple after sterilisation with Hydra Hand & Surface Sanitiser Liquid
- ◆ Hydra Hand & Surface Sanitiser Liquid anti-microbial hand sanitizer kills viruses and bacteria long after application
- ◆ Your skin and surface remains safe and cross contamination is prevented
- ◆ Use where water based sanitisers cannot be used e.g. in shoes or gloves

Description

Fast acting, fast drying Hydra Hand & Surface Sanitiser Liquid is rapidly absorbed into the skin, killing all harmful bacteria on contact.

Hydra Hand & Surface Sanitiser Liquid is gentle and does not cause the skin to 'dry-out' after use.

Hydra Alcohol Surface & Hand Sanitiser Liquid leaves a residual biocidal shield, this ensures that as bacteria is attracted to the skin.

Hydra Hand & Surface Sanitiser Liquid will continue to sterilise long after application, killing viruses and bacteria and preventing cross contamination.

Hydra Hand & Surface Sanitiser Liquid is versatile and is safe to use for sterilising equipment, cutting equipment, preparation surfaces, including surfaces where the use of water based disinfectant/sterilisers are undesirable and gloves and boots.

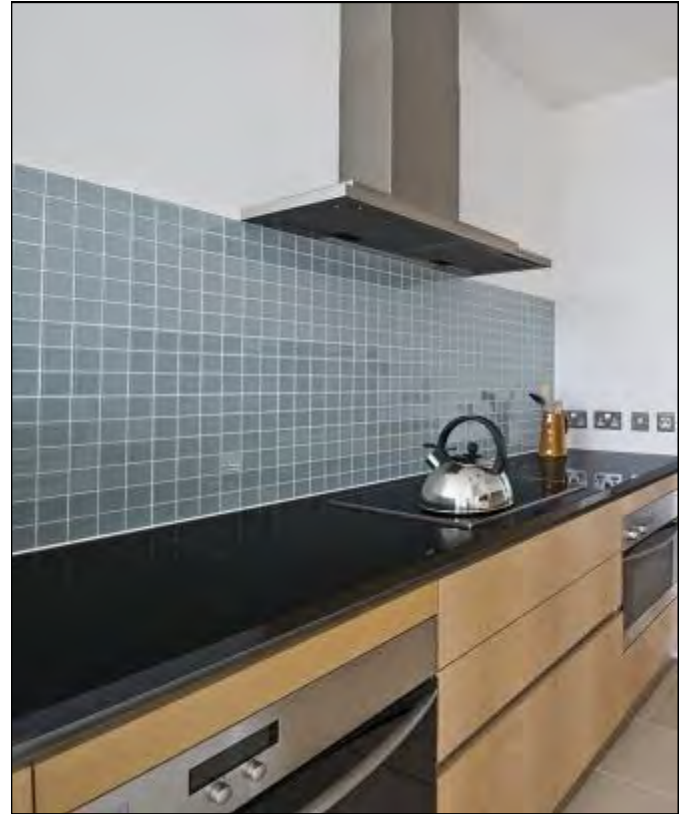

Tests prove that Hydra Alcohol Surface & Hand Sanitiser Liquid is effective against a wide spectrum of viruses, yeast, moulds and bacteria.

Description

Hydra Alcohol Surface & Hand Sanitiser Liquid is a gentle but powerful hand sanitizer liquid that is effective against wide range of harmful bacteria and virus. Residual action offers protection against microbes long after application.

Use for sterilizing surfaces, equipment, gloves, footwear etc.

Hydra Alcohol Surface & Hand Sanitiser Liquid is a food grade sanitiser and is used throughout creameries, meat and food plants, baby formulation manufacturers, breweries and high risk food areas.

How To Use

Dry wash and sterilising hands :

Dispense a small amount directly into palms. Rub hands together, paying special attention to the area around nails. Rub your hands until the product completely dries out.

Sterilise wet hands:

Wash hands prior to the use of Hydra Alcohol Surface & Hand Sanitiser Liquid using Zeta Gold biocidal skin soap. Apply Hydra Hand & Surface Sanitiser Liquid onto the washed hands as a drying cum sterilising agent. Hydra Alcohol Surface & Hand Sanitiser Liquid act as a secondary biocide for extra protection while eliminating the need of using wipes or towels to dry up hands after washing with water.

Disinfect footwear and gloves:

Spray the product directly above and inside the gloves, footwear or any other item you wish to disinfect. Allow time for drying up.

Disinfect cutting/ chopping equipment and knives:

- Apply Hydra Alcohol Surface & Hand Sanitiser Liquid over blades, use a clean cloth to wipe off. Allow drying time before using the articles.
- Alternatively fill the holding vessel with Hydra Hand & Surface Sanitiser Liquid and soak the articles to be disinfected. Take out the articles whenever required for food preparation. Wipe off excessive product, let dry.

Disinfect equipment and preparation surface:

Clean excessive debris. Spray Hydra Alcohol Surface & Hand Sanitiser Liquid over the surface or apply using wipes. Allow the wiped/sprayed surface to dry. Leaves the surface clean and sterilised.

Use Hydra Alcohol Surface & Hand Sanitiser Liquid in abattoirs, kitchens, farms, catering units, hospitals, zoo, kennels, catteries and veterinary hospitals.

Laboratory Facilities

Hydra International Ltd.'s Research & Development Laboratories are a hub of activity where new products are developed and formulated. We have working relationships with our raw material suppliers, many of these suppliers are major world-wide chemical manufacturers with their own development laboratories.

As a company we are well known in the chemical industry for being receptive to cutting edge new chemicals which can be incorporated into our products to achieve performance advantages. An important part of the International Standards that we hold is that of constant improvement. We show that we have achieved this at every independent audit.
