

HYDRA HDC-76

Heavy Duty Uric & Water Scale Remover

HYDRA®

Features & Advantages

- ◆ Offers completely germ free, bacteria free, odour free hygienic toilets.
- ◆ Contains biocides that eliminate bad odour producing bacteria.
- ◆ Heavy Duty Descale for toilets and urinals.
- ◆ Removes tough unsightly deposits due to limescale, hard water and uric acid.
- ◆ Powerful enough to use in frequently used toilets in restaurants and other public places.
- ◆ Low foaming and low fuming formula with powerful cleaning action.
- ◆ Get rid of stains as well as scales using single product.
- ◆ Reduces cleaning time.
- ◆ No need to use separate products for removing scales and general cleaning of urinals and toilets.
- ◆ Removes scale build up on the internal surface of drain pipes too, therefore maintains choke free drains.
- ◆ Helps to keep pipes clear of blockages and free flowing.

Description

Heavy duty lime scale remover for urinals and toilet. Dissolves scale accumulated inside waste outlets, drains and traps. Keeps drains free flowing, urinals and toilets odour free and shining.

Hydra HDC-76 is an effective water de-scaler and lime scale eliminator.

The product not only acts tough on scales and depositions but its fast acting biocide also removes bad odour. Its special formula does not produce excessive foam or fumes, making it safe to work with in closed environs.

Salts present in urine lead to uric salt depositions.

In addition to this most water supplies contain calcium and magnesium carbonates, which cause lime scale build up.

Uric acid depositions along with lime scale deposits not only cause bad smell but also increase the chance of blockages by reducing the space inside drains for free flow of waste water.

The Solution

HDC-76 is an effective water de-scaler and limescale eliminator. The product not only acts tough on scales and depositions but its fast acting biocide also removes bad odour.

Single product helps in cleaning and deodorising of toilets.

Its special formula does not produce excessive foam or fumes, making it safe to work with in closed environs.

HDC-76 kills bacteria and germs present on the surface of the toilet seats and urinals along with clearing up lime-scale, uric-scale build-up, and hard water deposit.

In traps and pipes removes lime-scale, hard water deposits and uric scale build-up helps to keep pipes clear of blockages and free-flowing.

Saves money by reducing cleaning time and eliminating the need for other cleaning products.

Everybody needs powerful toilet cleaner because washroom is the place from where bacteria generates and passes which gives rise to various diseases.

HDC-76 is a complete sanitizer and water scale reducer for wash rooms, toilets and urinals.

How To Use

Pour HDC-76 onto deposit to be dissolved. Allow to remain in contact until all contamination has been dissolved.

Temporary block outlet if necessary.

After treatment flush thoroughly with clean water.

Caution:

- ◆ Do not mix this product with bleach or any other product.
- ◆ Do not use on stainless steel.

Laboratory Facilities

Hydra International Ltd.'s Research & Development Laboratories are a hub of activity where new products are developed and formulated. We have working relationships with our raw material suppliers, many of these suppliers are major world-wide chemical manufacturers with their own development laboratories.

As a company we are well known in the chemical industry for being receptive to cutting edge new chemicals which can be incorporated into our products to achieve performance advantages. An important part of the International Standards that we hold is that of constant improvement. We show that we have achieved this at every independent audit.
