

HYDRA LIFT

Patio & Brick Cleaner

HYDRA®

Features & Advantages

- ◆ Blend of detergents, acids, inhibitors make it twice as effective as old-fashioned acid type cleaners.
- ◆ Acts rapidly dissolving the carbonates which hold deposits together.
- ◆ Reducing expensive clean-down time.
- ◆ Removes salt effervescence (white staining).
- ◆ Cleans away dirt and build-up from paving slabs without removing colour.
- ◆ Use for cleaning brickwork, patios, garages, pool surrounds, paving, concrete, floors and warehouses.
- ◆ Hydra Lift renews the coloured paving. Makes the surface on the pool surrounds clean and restores non-slip finish to surface.
- ◆ Makes the surface non slippery and safe to walk.
- ◆ Rapidly removes years of deposits and dirt build-up leaving surfaces like new.
- ◆ Economical to use. Covers and cleans 3-5 square metres per litre depending upon the staining intensity and surface porosity.

Description

Hydra Lift contains a blend of safe powerful acidic detergents and surfactants to remove excess mortar and salt effervescence (white staining) from all types of brickwork and paving in on easy operation.

Hydra Lift is suitable for all types and makes of brick and stone and unlike some brick cleaners which soak into the brickwork and are difficult to remove.

Hydra Lift contains active detergents which actually pulls the contamination out of the pores of the brickwork, foaming away the deposits and leaving the brickwork or stone professionally cleaned.

Safe to use on ferrous metals and most paint finishes.

Use Hydra Lift to clean away grime, salts and carbonates from patio tiles, slabs and paving. Removes slip in seconds.

Restores the colour of coloured paving.

Removes rust prior to re-painting. Use around pool sides to remove dirt build-up.

Ensures surfaces are clean and slip free.

The cleansing action of the detergents included in the product formula pulls out the deep seated dirt from the pores in the brickwork.

Description

Keeping your outdoors clean is as important as regularly vacuuming the floors and dusting your furniture inside your house.

Make you outdoors inviting and party ready during spring and summers with Hydra Lift.

This all-in-one product makes the taxing job of outdoor surface cleaning easy and less time consuming.

Hydra Lift is suitable to use all makes and types brands of stone and brick surfaces. Hydra Lift is not absorbed into the brickwork, like some of the other brick cleaners, therefore is easy to remove along with the grime and dirt.

Economical to use. Covers and cleans 3-5 square metres per litre depending upon the staining intensity and surface porosity.

The foam along with dirt is then easily rinsed away with water. Hydra Lift is also safe to use upon most paint finishes and ferrous metal surfaces.

Hydra Lift is an ideal cleaning product to heavy dirt build-up on patio tiles, paving, slabs etc.

Pool sides are immediately made slip free with Hydra Lift.

Hydra Lift is a powerful brick patio cleaner that also remove rust from your outdoor furniture, metal frames, grille etc. prior to any repainting job.

How To Use

Scrub Method

Wet area to be treated.

Apply Hydra Lift neat to 1:5 with water directly onto surface to be cleaned by plastic watering can.

Agitate with stiff polypropylene brush and rinse thoroughly with water.

Immersion Method

Use Hydra Lift in a plastic bath into which articles to be treated are dipped.

Allow articles to remain until contamination is dissolved.

Rinse thoroughly with clean water.

N.B. Do not use neat on stainless steel, galvanised, tin, aluminium, zinc or other similar surfaces.

Laboratory Facilities

Hydra International Ltd.'s Research & Development Laboratories are a hub of activity where new products are developed and formulated. We have working relationships with our raw material suppliers, many of these suppliers are major world-wide chemical manufacturers with their own development laboratories.

As a company we are well known in the chemical industry for being receptive to cutting edge new chemicals which can be incorporated into our products to achieve performance advantages. An important part of the International Standards that we hold is that of constant improvement. We show that we have achieved this at every independent audit.
